## Learn How Multi-Million \$ Companies Were Created From 3 Licensed Inventions Mike Watts

During this June 2022 meeting, Mike Watts will present how he transformed patented inventions licensed from other inventors into 3 consecutive multi-million dollar businesses. He will explain his entrepreneurial journey on how he licensed patents and built successful companies around them. He will even explain how he made a deal with Daymond John of Shark Tank.

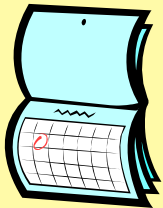

Mike is an experienced entrepreneur who has 6 startup companies under his belt including founding three consecutive multi-million dollar companies in the last 10 years. Mike has successful exits from three companies including one for over \$6 million.

He currently serves as CEO of [LoveHandle](#), a fast-growing American manufacturer of patented custom smartphone grips and accessories where he leads a team of 30 full-time employees. Another company he formed from a patented invention is called the [Root Anchor™](#) underground tree staking System which creates a professional sub-surface tree support secured deep into undisturbed soil.

Mike is a regular keynote speaker for entrepreneur and inventor groups as well a guest professor at Texas A M University's entrepreneur program in College Station. He is a 3-time winner of the Aggie 100 Award for fastest growing companies and has been listed on the Fortune 5000.
