

The Concept To Market Story Of A Personal Solar Light

James Ashmore

James Ashmore, founder and President of Vision3 Design, Inc., www.vision3design.com, will be our speaker for March and will present how his start-up company developed the new patent pending Personal Solar Light™ (PSL) and how this new life saving product is being brought to market. His presentation comes on the heels of the Personal Solar Light™, www.personalsolarlight.com, being introduced at the National Preppers and Survivalist Expo in Baton Rouge, LA.

James, a professional lighting consultant and designer is the PSL's co-inventor. Visualizing a simple solution to the pressing issue of "light" during and following disasters, this 3-year journey has come to fruition. The PSL has morphed into the most universal eco-friendly light available on the market. The Personal Solar Light™ offers anyone a sustainable, solar rechargeable option to grid, battery and hydro-carbon-fueled lighting devices any place, and any time.

During his presentation, James will review the Personal Solar Light™, its broad opportunities and applications and what separates the Personal Solar Light™ from existing items currently available. He will explain the science behind material selections, prototyping, and best of all, manufacturing challenges in this new era. James will also review moving to the next level in marketing and fund raising campaigns and expansion of the PSL line of products.

Also, please take this opportunity to pay your annual dues (\$25/\$95 Corporate), thanks!

Wednesday, March 8, 2017

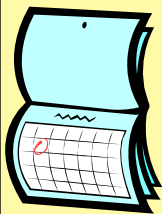

5:30-6:30 Networking 6:30-8:00 PM - Presentation

San Antonio Technology Center

3463 Magic Drive

(North of I-410 Between Callaghan and Fredericksburg Roads)

Public Invited

Alamo Inventors, a Special Interest Group (SIG) of Technology Connexus Association, is a non-profit organization made up of local area engineers, business people, professionals, students, faculty and people from all walks of life.
