

Reducing Unforced Errors In The Invention Lifecycle, From An Attorney's Perspective Jason McKinnie

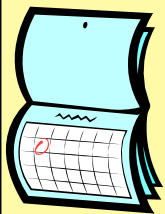

Jason McKinnie, a registered patent attorney with Gunn, Lee, & Cave, P.C., www.gunn-lee.com, will be our speaker for May and will provide his perspective on common legal issues arising during the invention lifecycle as well as practical guidance observed from his years of representing inventors.

The invention lifecycle, from conception to marketing a commercial embodiment, contain numerous legal traps that may limit an inventor's ownership in the invention, ability to seek patent protection, or otherwise profit from their hard work. Patent, copyright, and trademark law are confusing and complex, but identifying the issues early and knowing when to ask questions, can save headaches later.

Jason, an almost life-long San Antonio resident, obtained a B.S. in Genetics from Texas A&M University in 2001 and a law degree from St. Mary's in 2009. He has worked for Gunn, Lee, & Cave, P.C. as an attorney since 2009 representing individual inventors and companies concerning all aspects of intellectual property, including prosecution and litigation.

Also, please take this opportunity to pay your annual dues (\$25/\$95 Corporate), thanks!

Note: [This will be a Skyped Presentation.](#)

Wed., May 3, 2017 – Free Pizza in honor of Inventors Month

5:30-6:30 Networking 6:30-8:00 PM - Presentation

San Antonio Technology Center

3463 Magic Drive

(North of I-410 Between Callaghan and Fredericksburg Roads)

Public Invited

Alamo Inventors, a Special Interest Group (SIG) of Technology Connexus Association, is a non-profit organization made up of local area engineers, business people, professionals, students, faculty and people from all walks of life. Anyone interested in inventing and/or business and product development is welcome to attend and become a member.
