

Innovation in Tactical Breaching Products

Del Johnson

Del Johnson, VP of Sales & Marketing for Breaching Technologies, Inc. (BTI), is our speaker for January and will speak on "Innovation in Tactical Breaching Products". BTI was founded in 2003 by local San Antonio inventor, Mr. Darron Phillips. As a 19-year veteran of the San Antonio Police Department and having an extensive background in tactical breaching training, Mr. Phillips recognized a need for real life breaching training.

BTI's first product was a Mechanical Ram Breaching Training Door. Its patented locking system provides the simulation of breaching a wood frame, metal frame, or reinforced door. The Ram Door was constructed to allow the trainee to use one to three simulated pins that would break at pressures reflective of a wood or metal frame door. The use of three reinforced pins would provide the trainee with the alternative of looking toward a second form of entry.

Customers include law enforcement, military installations and tactical training facilities. Today BTI has representatives and distribution in 56 countries throughout the world. Other breaching tools offered by BTI include the Pry Door, Shotgun Lock Door, Explosive Door, Hydraulic Door, and the latest being the new and innovative Shotgun Hinge Breaching Door.

Visit Breaching Technologies Inc. website at <http://breachingtechnologiesinc.com>.

Also, please take this opportunity to pay your annual dues (\$25/\$95 Corporate), thanks!
