

## From Concept to Reality: The Journey to Bring the Layered MagWheel to the Road

David Gonzales II

David Gonzales II, founder and CEO of Impact Advanced Concepts, LLC is our speaker for October and will speak on "From Concept to Reality: The Journey to Bring the Layered MagWheel to the Road". Mr. Gonzales invented the patent-pending Layered MagWheel concept during his teenage years and has progressed it through several years of research and development. In late 2008, David became the first winner of the \$125,000 Conoco Phillips Energy Prize for the concept. The Layered MagWheel is designed to be positioned inside of the wheels of any vehicle to act as the braking system, the drive motor and a solid-state transmission all-in-one package.

In 2008, Mr. Gonzales graduated with honors in a three year period from UTSA with a Bachelor of Science degree. His company, Impact Advanced Concepts, is devoted to commercializing the Layered MagWheel as well as other innovative products.

Also, please take this opportunity to pay your annual dues (\$25/\$95 Corporate), thanks!

**Wednesday, Oct. 14, 2009**

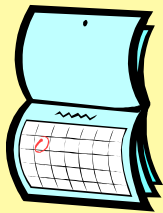

**5:30-6:30 Networking 6:30-8:00 PM - Presentation**

**San Antonio Technology Center**
